Parallel bore from 25 mm.		S4

Options	Suffix
Special versions on request	/ S

For parameters of the loads and moments see from page 1.26.25.  
For seal kits see from page 1.26.21.

Rodless cylinders, standard in the magnetic version. Cylinders with direct power transmission through the tube slot onto the yoke. The new cushionings are adjustable at both ends; the flow rate is regulated from 0 to 100% by turning a pin of an angle of 90°. The new barrel is provided with grooves for fixing various accessories. The magnetic switches can be fixed by a bracket or directly in the tube; the reed switch will not protrude out the barrel profile. They are fit for heavy loads and moments in every direction; they are double action force cylinders provided with central air connections. Should it be necessary, linear guides can also be applied at a later date (special application). The yokes are provided with front and side wiper strips.

For the magnetic reed switches ASV-ASC see page 1.26.40.  
For mounting accessories see from page 1.26.28.

▲ Internal seals (between the strip and the tube)	2	•	•	•	•	•	•
Teflon slides for guide	2			•		I	•

\* For the type S4 (parallel) one seal kit includes twice as many as the components are.

\*\* For the type S6 (double guide) one seal kit includes 4 Teflon slides.

How to order: 32 / 500 / SG / S4

32	/	500	/	SG	/	S4	
Bore	/	Stroke cylinder	/	Seal kit	/	Type	Option

▲ The length is according to the stroke of the cylinder.

All data concerning forces refer to a speed of  $V < 0,35$  m/s.

Keeping the indicated values ensures the maximum service life, the minimum noise and the best operating result.

Higher speeds reduce the admissible forces.

Were the working conditions out of the allowed limits (see table below), the energy of the mass in motion should be absorbed by devices (such as hydraulic cushionings, stops) mounted as much nearer as possible to the barycentre of the mass.

Type: **S1**

Ø mm	Force ( $V_{max} \leq 0,35$ m/s)			F (load in N)			Moments

Foot type: **P**

The feet can be mounted on the cylinder in all the 4 possible positions.  
The kit includes 2 feet and 8 bolts. Material: Anodised aluminium.

Code	Item	Ø mm	AA	AB	AC	AD	AE	AH
559010	P18S	18	15	2	10	20	6	2

559015	P63S	63	30	3	21	75	11	4,5

Mid support type: **SI**

The mid support must be used in case of deflection of the cylinder (see page 1.26.40).

The mid support can be used instead of the foot. It is advisable to install it at the end of the cylinder and to secure it against any sideways drift of the cylinder by means of 2 bolts with washers that are screwed in at the front.

The kit includes 2 mid supports and 8 bolts. Material: Anodised aluminium.

Code	Item	Ø mm	AE Ø	AH	BA	BB	BC	BD	BE	BF

Maximum admissible deflections

Fz at deflection of 0,5 mm.

Fz at deflection of 1 mm.

With cylinders of long strokes or heavy loads, you should pay attention to the tube deflection. One or more mid supports can be used according to the amount of deflection.

Example:

When applying a force Fz of 500 N a cylinder 25 mm should deflect by a maximum of 0,5 mm and be no longer than 750 mm as according to the diagram. Should you exceed 750 mm use one or more mid supports (see page 1.26.28).

Light flexible coupling type: **CL**

The light flexible coupling can be mounted where a guide must be connected to a rodless cylinder.  
The light flexible coupling transfers the action power to the guiding element without any tension.  
The kit includes 1 flexible coupling, 1 pin, 1 seeger, 2 distancers. Material: Anodised aluminium.

Code	Item	Ø mm	CA	CC	CD	CF	CG	CK	CM
559038	CL18S	18	50	25,5	30	9	M5	4	4

559035	CL63S	63	100	73	80	40	M10	8	8

Heavy flexible coupling type: **C**

The heavy flexible coupling works as the light ones but can be used with higher forces.  
The kit includes 1 flexible coupling, 1 pin, 1 seeger, 2 distancers. Material: Anodised aluminium.

Magnetic switch fixing

For magnetic switches type ASV  
(see page 1.110.1)  
use bracket AS109 (cod. 072916).

For magnetic switches type ASC  
(see page 1.110.2)  
direct mounting in the slot made in the tube.
