

# Solenoid valves series A2

## Electric scheme of multiple connector 25 poles

The transferring of the signals from the PLC to the valves is through a multi-pole connector capable of manage 24 signals. Such signals are distributed to the valves following the scheme hereunder. Peculiarities of these valves are:

- Simplicity of the electrical connection with each valve configuration;
- Type of valve will not limit the maximum number of valves applicable;
- Every type of valve can replace another maintaining the same electrical connection.
